

The phytoPal Reference Database

Collated and edited by G. L. Mullins
Contributions by R. J. Aldridge, K. J. Dorning and M. Vecoli
Based on Fensome et al. 1990

Funded by the Leverhulme Trust

Introduction

The ‘phytoPal Reference Database’ is primarily a list of publications on Lower Palaeozoic phytoplankton, although details of papers describing new taxa of Mesozoic and Cenozoic ‘acritarchs’ are also included. The majority of the papers listed here are cited in the ‘phytoPal Taxonomic Database’, although many publications describing the distribution and utility of Lower Palaeozoic phytoplankton have also been included.

Submission of new references and corrections

This database is by no means complete and the submission of new references, or the correction of typographical errors in existing references, is always welcome. A release date is given at the base of each page to make it clear whether this is the most up to date version of the database available.

Details of new papers and corrections should be sent to Gary Mullins (glm2@le.ac.uk). To speed up the inclusion of new references, please submit details in the style used in the database, with the journal title given in full. Thank you.
